Name _____

As you read Chapter(s) 3, in <u>AutoCAD 2004 Tutorial</u>, Shih, answer these questions. For True/False questions, if your response is False, give a reason or a counterexample (you may use a diagram to make your argument).

1. True/False:     In the **Drawing Units** dialog box, if you set the **Length Type** to **Decimal** this will set the **default Metric** unit, mm.

2. True/False:     By turning on the **ORTHO option**, that **constrains** cursor movement to the **horizontal** or **vertical** directions **relative** to the **current coordinate system**.

3. List 3 options that can be snapped to using the Object Snap option:

   _____     _____     _____

4. True/False:     The **Extend** command **lengthens** an object so that it **ends** precisely at a selected **boundary**.

5. True/False:     The **Trim** command **lengthens** an object so that it **ends** precisely at a selected **boundary**.

6. Which AutoCAD command can we use to create rounded corners? _____
